Autism Advanced Assessment 2027

ADI-R

Autism Diagnostic Interview - Revised

The Autism Diagnostic Interview - Revised (ADI-R) is a semi-structured diagnostic interview to assess behaviours related to autism. The ADI-R typically takes between 90 minutes to 3 hours. The workshop is designed to teach clinicians how to administer and code ADI-R with parents/carers of children and young people with suspected autism.

During this **two-and-a-half-day workshop**, participants will:

- Learn about the underlying principles of the ADI-R
- Practice administration of the ADI-R in role play
- Watch a variety of video administrations of the ADI-R and practice coding
- Participate in the administration of the ADI-R with a volunteer parent/carer of child or young person with autism.
- Learn how to code the caregiver's responses during the interview.

Trainees will have the opportunity to conduct part of an ADI-R interview and receive feedback.

Who is the training for?

Psychologists, speech pathologists, occupational therapists, paediatricians, and psychiatrists with a background in standardised testing.

Presenters

Psychologist **Deborah Sweeney** has been training clinicians in the use of the ADI-R and ADOS-2 for many years throughout Asia and the Pacific region. Deborah was previously working in autism research at Monash University and now works in private practice providing consultation for complex presentations of autism.

Prerequisite Training

For child and adolescent clinicians:
Autism Assessment Fundamentals and Co-occurring Conditions
OR
For adult clinicians:
Adult Autism Advanced
Please see our FAQs on our website for further information on prerequisites.

DATES (8:30 am - 4:30 pm*)

Wednesday 20 - Friday 22 January (Online via Zoom)
Monday 1 - Wednesday 3 March **(In-person, VIC)**
Tuesday 11 - Thursday 13 May (Online via Zoom)

COST: $1,019* / $2,070

*Subsidised rate for Victorian clinicians in ICYMHS, AMHS/Forensicare, headspace, Take Two, ACCHOs, and Children's Health and Wellbeing Locals.
