

3DI - DEVELOPMENTAL, DIMENSIONAL, AND DIAGNOSTIC INTERVIEW

mindful.org.au/Autism-Training.aspx

WHO IS THE TRAINING FOR? Mental Health Clinicians, Child & Adolescent Psychiatrists, Pediatricians, Psychologists, Speech Pathologists, and Occupational Therapists.

WHO PROVIDES THE TRAINING? Richard Warrington, 3Di software developer & training manager at University College London.

WHAT DOES THE TRAINING INVOLVE?

"A revolutionary, computer based interview for the diagnosis of autism and related disorders in children."

3Di is a computer-based program used to diagnose autism and related disorders in children. Its main features include:

- computes the severity of features associated with a diagnosis of autism
- computes levels of behavioral adjustment
- establishes comorbidity across the full range of child psychiatric disorders
- generates a comprehensive report suitable for parents and referrers
- liked by parents
- excellent reliability and validity; criterion validity established in relation to the ADI-R
- no double-entry: for research, all data can be exported so SPSS
- provides an audit trail invaluable for clinical governance

The interview emulates Autism Diagnostic Interview (ADI-R) algorithms, but unlike that interview it is focused largely on current rather than historical behaviour of note. Consequently, it has high levels of agreement with the Autism Diagnostic Observation Schedule (ADOS) in clinically significant autistic disorders. It is also DSM-5 compatible.

WHAT DO YOU NEED?

- Laptops will be supplied for the course.
- At the completion of the course to install the program on your own laptop or desk-top you will need Microsoft Windows (Windows 7 or later) and to have the 32-bit version of Microsoft Office installed (Office 2010 or later). The 3Di will run on Apple Macs, but only by installing a virtual machine such as Parallels or VMware Fusion - on which a Windows operating system and Microsoft Office would need to be installed. Windows 7 and Office 2010 are fine - later versions are also fine.

Please note:

We encourage early registration as some workshops reach capacity quickly. Additional workshops may be scheduled if there is sufficient interest.

Fees listed include the Goods and Services Tax (GST).

Where are we?

Mindful - Centre for Training and Research in Developmental Health
Department of Psychiatry,
University of Melbourne

Building C, 50 Flemington St,
Travancore, VIC 3032

Parking is not available on site, see Mindful website for further information.

Enquiries

Please direct enquiries to Frances Saunders, Statewide Autism Training Coordinator at

✉ mindful-asd@unimelb.edu.au

☎ 03 9371 0200

THE COURSE INCLUDES:

- Installer for the 3Di system & a single-user licence
- 1 year comprehensive skype & email support
- 1 year entitlement to developments of the 3Di system

DATES (8.45am - 4.30pm)

Thursday 2 to Friday 3 July 2020

Monday 6 to Tuesday 7 July 2020

COST: \$1540

Subsidised rate of \$770 is available for Victorian CYMHS/CAMHS clinicians (limited places)
