

AUTISM DIAGNOSTIC INTERVIEW REVISED (ADI-R) 2022

WHAT IS THE ADI-R?

The ADI-R is a semi-structured diagnostic interview to assess behaviours related to Autism Spectrum Disorder (ASD). The ADI-R typically takes between 90 minutes to 3 hours. The course is designed to teach clinicians how to administer and code ADI-R with parents/ carers of children and young people with suspected ASD.

WHO PROVIDES THE TRAINING?

Psychologist Deborah Sweeney has been using the ADI-R and ADOS in complex, multi-disciplinary assessments for over 15 years and regularly trains health professionals in the ADI-R and ADOS throughout the Asia Pacific region.

WHAT DOES THE TRAINING INCLUDE?

During this two and a half day training, participants will:

- Learn about the underlying principles of the ADI-R
- Learn how to code the caregiver's responses during the interview
- Observe and discuss an administration of the ADI-R with parents/carers of child or young person with ASD
- Trainees have the opportunity to conduct part of a ADI-R interview and receive feedback and coding advice

For clinicians wanting to achieve research level reliability, Deborah offers the "Personal ADI-R Reliability Package". This includes scoring an ADI-R DVD administration, submission of your own recording of ADI-R, feedback and certificate once reliability is achieved. This is a separate cost from the course for those who wish to pursue reliability.

View all our ASD training workshops at:

mindful.org.au/Autism-Training.aspx

Please note:

We encourage early registration as some workshops reach capacity quickly. Additional workshops may be scheduled if there is sufficient interest.

Fees listed include the Goods and Services Tax (GST).

Where are we?

Mindful – Centre for Training and Research in Developmental Health
Department of Psychiatry,
University of Melbourne

This training will be delivered online via live Zoom videoconference
