

# AUTISM DIAGNOSTIC OBSERVATION SCHEDULE SECOND EDITION (ADOS-2) TODDLER MODULE

[www.mindful.org.au/Autism-Training](http://www.mindful.org.au/Autism-Training)

What is the ADOS-2 Toddler Module?

The Toddler Module of the Autism Diagnostic Observation Schedule, Second Edition (ADOS-2) is a fifth module that is specifically designed to assess children with limited expressive language who are between the ages of 12 and 30 months. Similar to the other ADOS-2 modules, the Toddler Module consists of standardised activities in which communication, social interactions, and restricted and repetitive behaviours relevant to the diagnosis of autism spectrum disorder (ASD) can be observed.

What does the training include?

This is an introductory workshop specific to the Toddler Module and includes lecture, videos, practice with scoring, and discussions.

Who is the training for?

This workshop is designed for those with extensive experience in working with very young children both with and without autism spectrum disorder and with a background in standardised testing. A pre-requisite of this workshop is completion of ADOS / ADOS-2 training (Introductory or Advanced workshops).

Who provides the training? - Deborah Sweeney

Deborah has been using the ADI-R and ADOS in complex, multi-disciplinary assessments for over 15 years and regularly trains health professionals in the ADI-R and ADOS throughout the ASIA Pacific region.
