

AUTISM DIAGNOSTIC OBSERVATION SCHEDULE SECOND EDITION (ADOS-2) ADVANCED

mindful.org.au/Autism-Training.aspx

WHAT IS THE ADOS-2?

The Autism Diagnostic Observation Schedule Second Edition (ADOS-2) is a semi-structured, standardised assessment of communication, social interaction, and play. It provides a series of standardised contexts in which the individual's social, communication and repetitive, stereotyped behaviours can be observed. It has been designed to assist in the diagnosis of autism and pervasive developmental disorders and is suggested as a complementary instrument to the Autism Diagnostic Interview Revised (ADI-R). Standardised toys and activities are used to present opportunities for social and communicative interaction with the examiner. During these activities, observation of the individual notes the absence or presence of behaviours of interest. A diagnostic algorithm consistent with DSM-V and ICD-10 clinical diagnoses is generated.

WHO IS THIS WORKSHOP FOR?

Clinicians seeking to improve their level of skill and accuracy in their administration and coding of the ADOS-2, a anyone using ADOS-2 in research.

WHO PROVIDES THE TRAINING?

Psychologist Deborah Sweeney has been using the ADI-R and ADOS in complex, multi-disciplinary assessments for over 15 years and regularly trains health professionals in the ADI-R and ADOS throughout the Asia Pacific region.

WHAT DOES THE TRAINING INCLUDE?

This two and a half day workshop provides:

- Hands on administration of the ADOS-2
- Small group learning
- Intensive instruction about administration and coding

PREREQUISITE TRAINING

Participants are required to have completed the 2 day Introductory or Clinical ADOS-2 workshop (at Mindful or another venue).

Please note:

We encourage early registration as some workshops reach capacity quickly. Additional workshops may be scheduled if there is sufficient interest.

Fees listed include the Goods and Services Tax (GST).
