

Advanced Assessment 2026

ADOS-2 Advanced

Autism Diagnostic Observation Schedule - Second Edition

What is the ADOS-2?

The Autism Diagnostic Observation Schedule - Second Edition (ADOS-2) is a semi-structured, standardised assessment of communication, social interaction, play, and behaviour. It has been designed to assist in the diagnosis of autism and is a complementary instrument to the Autism Diagnostic Interview Revised (ADI-R).

What does the training include?

- Hands on administration of **Modules 1-4** of the ADOS-2 to live experienced volunteers
- Small group learning
- Intensive instruction and support to administer and code the ADOS-2

Due to the intensive nature of this training the group is limited to **10 participants**.
Morning/afternoon tea and lunch is included.

Completion of pre-course work is required. Materials will be sent 1-2 weeks prior to the workshop date.

Who is the training for?

Clinicians seeking to improve their level of skill and accuracy in their administration and coding of the ADOS-2, and anyone using ADOS-2 in research.

Prerequisite Training

ADOS-2 Introductory

Please see our FAQs on our website for further information on prerequisites.
