

ASD ASSESSMENT FUNDAMENTALS AND CO-OCCURRING CONDITIONS 2023

WHO IS THE TRAINING FOR?

Psychologists, speech pathologists, occupational therapists, social workers, psychiatric nurses, paediatricians, advanced trainees in child & adolescent psychiatry, CYMHS/CAMHS employed psychiatry registrars, CYMHS/CAMHS clinicians, Headspace clinicians and paediatric fellows.

WHO PROVIDES THE TRAINING?

Multidisciplinary specialist autism and neurodevelopmental assessment teams from a range of Victorian Child & Youth Mental Health Services.

WHAT DOES THE TRAINING INCLUDE?

This online training aims to provide a comprehensive grounding in the complexities of autism spectrum disorder (ASD) assessment. Following the training you should be able to identify symptoms of autism in the clients you see and refer appropriately for further assessment. Alternatively, you may wish to enrol in further training in autism assessment such as ADOS-2, ADI-R or 3di. This two-day workshop includes:

- Case assessments: Preschool, School-Aged and Adolescent
- ASD developmental history taking
- Differential diagnosis and co-occurring mental health conditions
- Formulation of complex cases
- Providing feedback to families
- Guidelines for report writing

This training was previously known as the Complexities of ASD Assessment. This workshop is a prerequisite to enrolling in the ADOS-2 and ADI-R workshops offered at Mindful. Pre-reading materials will be emailed 1-2 weeks before the workshop. This information will be assumed knowledge for the training.
