

Adult Autism Advanced

Who is the training for?

Mental health clinicians **working with adults** who want to learn more about the diagnostic process for autism. E.g. Psychiatrists, psychologists, occupational therapists, social workers, speech pathologists, mental health nurses, peer support workers, etc.

Who provides the training?

This training will be delivered by the Royal Melbourne Hospital Autism Consultation and Evaluation Service team:

Dr. Emma Radford, Consultant Psychiatrist

Elle Perry, Clinical Psychologist

Leonie Wilson, Speech Pathologist

What does the training include?

This 2-day live webinar will focus on providing practical tools for assessing and understanding how autism presents in **adults**. Topics covered will include:

- Best practice tools and processes for screening and diagnostic assessment of autism in adults
- Common co-occurring mental health and neurodevelopmental differences in autistic adults
- Case example of an adult autism assessment, including formulation
- Neuroaffirming feedback processes and recommendations for post diagnostic support
- Lived and living experience perspectives.

Please note this training does not focus on moderate to severe intellectual disability and associated behavioural interventions. Please contact Mindful for further information with regards to training options in this area.
