Mindful
Centre for Training and Research in Developmental Health

Adult Autism Advanced

This 2-day live webinar will focus on providing practical tools for assessing and understanding how autism presents in **adults**. Topics covered will include:

- Best practice tools and processes for screening and diagnostic assessment of autism in adults
- Common co-occurring mental health and neurodevelopmental differences in autistic adults
- Video case example of an adult autism assessment, including formulation
- Neuroaffirming feedback processes and recommendations for post diagnostic support
- Lived and living experience perspectives.

Please note this training does not focus on moderate to severe intellectual disability and associated behavioural interventions. Please contact Mindful for further information with regards to training options in this area.

Who is the training for?

Mental health clinicians **working with adults** who want to learn more about the diagnostic process for autism, e.g. psychiatrists, psychologists, occupational therapists, social workers, speech pathologists, mental health nurses, peer support workers, etc.

Who provides the training?

Presented by multidisciplinary autism assessment teams in Victorian Adult Public Mental Health Services and lived and living experience representatives.
