

ASD ASSESSMENT FUNDAMENTALS AND CO-OCCURRING CONDITIONS

July - December 2024

WHO IS THE TRAINING FOR?

Psychologists, speech pathologists, occupational therapists, social workers, mental health nurses, paediatricians, advanced trainees in child & adolescent psychiatry, CYMHS/CAMHS/ICYMHS clinicians, headspace clinicians and paediatric fellows.

WHO PROVIDES THE TRAINING?

Multidisciplinary specialist autism and neurodevelopmental assessment teams from a range of Victorian Infant, Child & Youth Mental Health Services (ICYMHS) & lived and living experience workers (LLEWs).

WHAT DOES THE TRAINING INCLUDE?

This online training aims to provide a comprehensive grounding in the complexities of Autism Spectrum Disorder (ASD) assessment. Following the training you should be able to identify autism in the clients you see and refer appropriately for further assessment. Alternatively, you may wish to enrol in further training in autism assessment such as ADOS-2 or ADI-R. This two-day workshop includes:

- Exploration of integrating clinical ASD assessment with neuroaffirming practice principles
- Videos of two assessments: Preschool/School-Aged and Adolescent
- How to take a neurodevelopmental history
- Differential diagnosis and co-occurring mental health conditions
- Understanding language and social communication differences
- Understanding differences in sensory processing
- Formulation of complex cases
- Providing neuroaffirming assessment feedback to families
- Guidelines for report writing.

This workshop is a prerequisite to enrolling in the ADOS-2 and ADI-R workshops offered at Mindful. Pre-reading materials will be emailed 1-2 weeks before the workshop. This information will be assumed knowledge for the training.

View all our Autism training workshops at:

<https://mindful.org.au/asd-training>

Please note:

We encourage early registration as some workshops reach capacity quickly. Additional workshops may be scheduled if there is sufficient interest.

Fees listed include the Goods and Services Tax (GST).
